

ABOUT GLOBAL CITIZEN

GLOBAL CITIZEN IS HEADQUARTERED IN DENMARK. IT IS CO-FOUNDED BY SØREN WINTHER LUNDBY AND THUSAN CEYLONS. THE PROFOUND IDEAS BEHIND GLOBAL CITIZEN DATE BACK MORE THAN 12 YEARS, BUT IT IS WITHIN THE PAST THREE YEARS THE ORGANISATION HAS UNDERGONE A TRANSFORMATION TO WHAT IT IS TODAY.

Global Citizen gathers and strengthens the ABC+ Alliance (Academia, Business, Civil Society) and has developed the world's first taxonomy on globalisation, structuring more than 2,300 key topics.

On the fringes of Global Citizen, the undersigned have co-founded www.spotter.one together with Thupi Ceylons. Today, Spotter is an independent start up, but will be used by Global Citizen as an integrated tool to further the vision of one sustainable world for everyone.

Global Citizen has also set up www.talent.one with the intention of creating a network of 100,000 global, "sustainability talents" by the end of 2021. In between Global Citizen will host events in Denmark, Europe and the rest of the world which will gather global talents. This will happen in a partnership with the UNSDSN and others.

Eventually, Global Citizen aims at co-developing a global, informal participatory infrastructure (PI). The PI should facilitate global, lasting and regular face-to-face meetings for millions of global citizens and give birth to a Massive Online Collaboration Platform that will take human problem solving to its next level. We are sure that humanity's total creative power has far more to offer for the common good.
